

Residential Energy Code Worksheet

KITSAP COUNTY

Department of Community Development

BASIC PERMIT PACKAGE
REVIEWED FOR CODE COMPLIANCE
WITH IRC 2015
KITSAP COUNTY BUILDING DEPARTMENT

The Residential Energy Code Worksheet is a tool to help you plan your energy code needs for new or remodeled homes to ensure compliance with code requirements. More resources and a copy of the energy code, optional worksheets and glazing forms can be found [here](#).

This document will cover the following features:

- **Heating, Ventilation and Air Conditioning (HVAC):** Requirements for efficiency of heating and cooling equipment for your house.
- **Building Envelope:** Requirements and options for roofs, walls, windows - these control heat loss and leakage.
- **Water Heating:** Equipment efficiency and controls

NOTE: All of the details of your energy efficiency plan selected in this document must be clearly shown on your construction plans in order for application to be approved.

rroupe@envisionnorthwest.com

Is this an addition to an existing structure?

No

Heating Ventilation and Air Conditioning Requirements

All options for whole house ventilation shall provide outdoor air at a continuous rate of not less than the Airflow Rate shown below. This is automatically calculated in accordance with [Tables M1507.3.3\(1\) & 1507.3.3\(2\)](#) based on square footage of structure and number of bedrooms.

Select Proposed Heating System, be sure to show on plans.

Forced Air System: Use air as the heat transfer medium, relying on ductwork and vents to distribute.

Select Prescriptive Whole House Ventilation

Continuous Exhaust Fan

Select Square Footage of Structure

<1,500

Number of Bedrooms

2-3

Required Airflow CFM (Label on Plans):

45

Exception: The whole house mechanical ventilation system is permitted to operate

Established Basic Permit #

19-03646

Permit Number: 20-04894

intermittently where the system has control that enables operation for not less than 25% of each 4 hour segment. The ventilation rate below is multiplied by the run time factor in accordance with Table 1507.3.3(2) to determine required fan size.

Table M1507.4

Please note:

Exhaust fans are required in any room where water vapor, or cooking odor is produced, i.e. kitchen, bathroom, powder room, laundry room, indoor swimming pool, spa, etc. See Table M1507.4 for the minimum exhaust fan sizes. Minimum source specific ventilation - your proposed system shall not be less.

CFM=Cubic Feet per min.	Laundry rooms or Bathrooms	Kitchens
Intermittently Operating	50 cfm	100 cfm
Continuous Operation	20 cfm	25 cfm

Required Energy Credits

Conditioned Floor Area
<1,500 Square Feet

Minimum Required Energy Credits
1.5

Total Energy Credits Selected Below
1.5

Select Options to Meet Minimum Required Energy Credits

There are five categories below, select credits to meet the calculated minimum required energy credits. **As the number of credits increase, your home becomes more energy efficient! You may elect to exceed the required number of credits.**

All selected options must be shown on the construction plans.

Key Terms:

R-Value = Thermal Resistance, time rate of heat flow through a body.
U-Factor = Thermal Transmittance, heat transmission (air to air) through a building component, equal to the time rate of heat flow per unit area and unit temperature.
Fenestration = Fenestration windows and other products with glass and non-glass glazing materials.
Glazing = Glass part of windows

Established Basic Permit #
19-03646

Permit Number: 20-04894

Water Heating Options

1. Use the dropdown to review credits available and read description to see if you qualify.
2. **Click Select Credit -Yes** next to the option you would like to add credits to your total credits selected. A list of your selected credits selected will automatically populate a summary on the next page.

To See Details and Select Credit Choose from Options Below

Efficient Water Heating 5a -- Lowflow fixtures

Select Credit? Credits

Yes

.5

EFFICIENT WATER HEATING 5a:

Verify you can meet all requirements below and then click Select Credit - Yes to update total Energy Credits Selected.

This credit may be used in addition to other Water Heating Options in this category.

Qualified Lowflow Fixtures:

All showerhead and kitchen sink faucets installed in the house shall be rated at 1.75 GPM or less. All other lavatory faucets shall be rated at 1.0 GPM or less.*

To qualify to claim this credit, the building permit drawings shall:

- Show all fixtures: showerheads, kitchen sink faucets and other lavatory faucets.
- Label the maximum flow rates for all showerheads, kitchen sink faucets and other lavatory faucets.

***Plumbing Fixtures Flow Ratings.** Low flow plumbing fixtures (water closets and urinals) and fittings (faucets and showerheads) shall comply with the following requirements:

1. Residential bathroom lavatory sink faucets: Maximum flow rate - 3.8 L/min (1.0 gal/min) when tested in accordance with ASME A112.18.1/CSA B125.1.
2. Residential kitchen faucets: Maximum flow rate - 6.6 L/min (1.75 gal/min) when tested in accordance with ASME A112.18.1/CSA B125.1.
3. Residential showerheads: Maximum flow rate - 6.6 L/min (1.75 gal/min) when tested in accordance with ASME A112.18.1/CSA B125.1

HVAC Equipment Options

1. Use the dropdown to review credits available and read description to see if you qualify.
2. **Click Select Credit -Yes** next to the option you would like to add credits to your total credits selected. A list of your selected credits selected will automatically populate a summary on the next page.

***Projects may only include credit from one space heating option, 3a, 3b, 3c or 3d. When a housing unit has two pieces of equipment (i.e., two furnaces) both must meet the standard to receive the credit.**

To See Details and Select Credit Choose from Options Below
High Efficiency HVAC Equipment 3a -- Gas, propane or oil furnace

Select This Option	Credits	HIGH EFFICIENCY HVAC EQUIPMENT 3a:*
Yes	1	Gas, propane or oil-fired furnace with a minimum AFUE of 94%

To qualify to claim this credit, the building permit drawings shall:

- Show location of HVAC equipment in the applicable location.
- Label the AFUE on/near equipment

***Since you have selected 3a YOU MAY NOT CHOOSE 3b, 3c or 3d.**

When a housing unit has two pieces of equipment (i.e., two furnaces) both must meet the standard to receive the credit.

Whole House Air Leakage Control and Efficiency

These credits set a standard for a structure's air tightness using a [Blower Door Test](#). This reduces energy consumption due to air leaks. If a credit from this section is selected, Blower Door Test results are required to be on site for final inspection. Each credit contains requirements for the maximum air leakage and whole house ventilation requirements.

Established Basic Permit #

19-03646

Permit Number: 20-04894

1. Use the dropdown to review credits available and read description to see if you qualify.
2. **Click Select Credit -Yes** next to the option you would like to add credits to your total credits selected. A list of your selected credits selected will automatically populate a summary on the next page.

To See Details and Select Credit Choose from Options Below

No Air Leakage Control and Efficiency Options

Building Envelope (Windows, Walls, and Floors etc.)

These credits relate to whole house energy efficiency. Each credit contains requirements for [insulation \(R-Values\)](#) and [energy efficient windows \(U-Factor\)](#).

R-value: An insulating material's resistance to conductive heat flow is rated using an R-value -- *the higher the R-value, the more effective the insulation.*

U-factor: Indicates how much energy will be lost from a building through its windows -- *the lower the U-value, the more efficient.*

1. Use the dropdown to review credits available and read description to see if you can qualify.
2. **Click Select Credit -Yes** next to the option you would like to add credits to your total credits selected. A list of your selected credits selected will automatically populate a summary on the next page.

***All options in this category require that you :**

- Label R-Values and U-Factors on building permit drawing in the applicable location
- Submit completed [Glazing Schedule Form](#) and provide on job site at final inspection.
